MANNHEIMER SWARTLING

MANNHEIMER SWARTLING has been at the forefront of Swedish business law for many years. Our lawyers advise clients within virtually all business sectors on a daily basis and are involved in most major business transactions in Sweden. As a result, our lawyers have considerable breadth of experience in dealing with the most common and the most complex legal issues. Our Swedish offices are in Stockholm, Gothenburg, Malmö and Helsingborg. We have offices abroad in New York, Frankfurt, Berlin, St. Petersburg and Brussels.

LIFE SCIENCES – FROM ADVICE ON RESEARCH
AND DEVELOPMENT TO AUTHORISATION AND
SALE OF THE END PRODUCT

Mannheimer Swartling's Life Sciences team advises in all areas, from research and development to market authorisation and distribution of the final product. Team members have extensive experience of the field and supply a full range of services to the Life Sciences industry. Our clients include multinational corporations as well as start-ups and other entrepreneurial ventures in the pharmaceutical, biotechnology and medical devices industry. We also act for producers of functional foods and borderline products in the food and cosmetic industries.

We advise clients throughout all phases of a product's life cycle. Our experience includes research and development agreements, technology licensing, strategic joint ventures and projects, clinical trials, market authorisations (including data exclusivity and the abridged procedures), labelling, distribution, pricing and reimbursement, generic substitution, parallel imports, marketing, branding and therapeutic information, sponsorship and compliance programmes. We regularly advise clients on matters before the Swedish Pharmaceutical Industry Information Examiner (IGM) and the Information Practice Committee (NBL) as well as the courts and other authorities.
